FR: IMPORTANT - A CONSERVER POUR CONSULTATION ULTERIEURE - A LIRE SOIGNEUSEMENT.

Le lit supérieur ne convient pas pour les enfants de moins de six ans en raison du risque de blessure due aux chutes du lit.

Les enfants peuvent se coincer entre le lit et le mur. Pour réduire le risque de blessure grave, la distance entre la barrière de sécurité supérieure et la paroi doit être inférieure à 75 mm ou plus de 230mm.

Assemblez le lit suivant les instructions décrites ci-dessous. Lisez attentivement les instructions de montage de l'échelle. Ne modifiez jamais le design et le montage de ce lit.

Avant la mise en service du lit, contrôlez si toutes les pièces détachées sont en bon état, sont bien serrées et ne présentent pas de bords tranchants auxquels l'enfant pourrait se blesser ou rester accroché par ses vêtements (ou cordelettes, collier, ruban de la tétine), ce qui comprend un risque de pendaison. Contrôlez tous les points de jonction.

Contrôlez régulièrement le lit pour détecter les pièces cassées, tordues ou manquantes. Si c'est le cas, mettez le lit hors service.

Remplacement de composants : Utilisez toujours des pièces détachées originales, à obtenir chez le fabricant ou le distributeur.

N'utilisez jamais les lits sans les fonds. Matelas : L'épaisseur du matelas doit être telle que la distance de la surface du matelas jusqu'à la partie supérieure du cadre du lit soit au moins 160 mm. L'épaisseur maximale du matelas est indiquée sur un des pieds du lit par un trou de 3 mm de profondeur. Utilisez un matelas de 200x90x15H cm ou 190x90x15H cm selon la commande et ne superposez jamais deux matelas.

Ne pas laisser dans le lit un objet quelconque pouvant servir de point d'appui à l'enfant. Ne pas laisser traîner des objets pouvant être avalés par l'enfant, pouvant ainsi l'étouffer ou présenter un danger de strangulation. N'accrochez pas d'objets au ou par-dessus le lit et n'en mettez pas contre le lit.

Ne placez jamais le lit à proximité d'une source de chaleur, comme un chauffage électrique, un chauffage au gaz, etc., afin d'éviter tout risque d'incendie.

Ce lit répond aux exigences de sécurité décrites dans la norme EN 747:2012.

ES: IMPORTANTE - A CONSERVAR PARA FUTURAS CONSULTAS - LÉASE ATENTAMENTE

Preste atención cuando niños (menores de 6 años) utilizan la cama a causa del riesgo de caerse de la cama!

El espacio entre litera y pared no debe ser superior a 75 mm, o debe ser más de 230 mm. Por favor observe estas medidas ya que de lo contrario su niño podría quedar aprisionado entre cama y pared.

Verifique de tiempo en tiempo los ensamblajes con tornillos y, en su caso, vuelva a apretarlos para que la estabilidad de la estructura no sufra menoscabo. De ningún modo utilice la cama si faltase o se hubiese roto cualquier elemento constructivo.

El espesor del colchón elegido debe tener unas dimensiones tales, que la altura interna (es decir desde la superficie del colchón hasta la parte superior de la estructura de la cama) sea al menos de 160 mm. Este nivel máximo es localizable por un hoyo de 3mm de profundidad en la cabeza de la cama.

Esta cama es fabricada para recibir un colchón de 200x90 cm o 190x90 cm según su mando.

No utilizar más de un colchón en la cama.

Preste atención a que en la cama alta o de pisos no se hayan sujetado o colgado cuerdas, cordones, correas o cintas. Su niño podría estrangularse.

Tener presente el riesgo de situar la cuna cerca del fuego o de otras fuentes de calor, tales como aparatos de calefacción eléctricos, de calefacción a gas, etc.

Producto conforme a las normas europeas EN 747:2012

EN: IMPORTANT - KEEP FOR FUTURE REFERENCE - PLEASE READ CAREFULLY.

The upper bed is not suitable for children under six years due to the risk of injury from falls.

Children can become trapped between the bed and the wall. To avoid risk of serious injury the distance between the top safety barrier and the wall shall not exceed 75 mm or shall be more than 230 mm.

Assemble the bed following the instructions hereunder. Read carefully the instructions regarding positioning and connection of the ladder.

Do not change the design and the assembly method of this bed.

Before putting into use, check if all parts of the bed are in good condition, well tightened, and do not show sharp edges which may injure the child or snag on its clothing (or cords, necklaces, ribbons), causing a strangulation hazard. Check all connection points. Regularly check the bed for broken, warped or missing parts. In such a case, no longer use the bed.

Replacement of parts: Always use original parts, to be obtained from the manufacturer or the distributor.

Do not use this bed without the bottom panel.

The thickness of the mattress must be so that the distance between the upper side of the mattress and the upper side of the bed is minimally 160 mm. The maximum thickness of the mattress is permanently marked by a 3 mm hole on a bed post. We recommend a mattress of 200x90x15H cm or 190x90x15H cm according to the order. Do not put two mattresses on top of each other.

Do not leave anything in the bed which could provide a foothold or create a danger of suffocation or strangulation. Do not hang anything on or over the bed, do not place anything against the bed.

Do not place the bed near a heat source such as electrical heating, gas heating, etc. in order to avoid any fire hazard.

This bed meets the safety prescriptions provided in the EN 747:2012.
